

CARROTS

Flamenco Vil F1

- Middle - late variety, for main season segment – summer sowing. Excellent shape, good disease resistance and high yielding potential
- Nates Kuroda hybrid
- Vigorous growth
- Cylindrical shape
- Good uniformity, well rounded tip, smooth skin
- Root length about 20 – 22cm (the root length and diameter depends on the sowing population)
- Good internal and external color with a small core
- Upright habit, adapted to mechanical harvesting
- Strong foliage attachment
- Matures at around 115 days (depending on season)
- Good tolerance to splitting

Disease Resistance Chart

HR/IR	Common Name	Abbreviation
HR	Alternaria Dauci	Ad
HR	Powdery mildew	Eh
IR	Cavity Spot, Aster Yellow	P

* Resistant varieties may exhibit some disease symptoms or damage under heavy pest pressure and/or under adverse environmental conditions and/or in the face of new biotypes, pathotypes, races or strains of the pest that may emerge. Soil temperature above 27°C and other stresses may cause nematode resistance to break.

**Please refer to the ISF definitions at http://www.worldseed.org/wp-content/uploads/2017/05/Definition_on_reaction_plants_to_pests_2017_final.pdf
A copy of the definitions for terms describing reactions of plants to pests for the Vegetable Seed Industry, can be obtained at our offices upon demand.
